Is Lesotho launching a solar mini-grid project?

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Can a company build a minigrid in Lesotho?

There are other companies building minigrids in Africa, but OnePower is the only one to have accomplished the feat in Lesotho, and it's not hard to understand why. Known as the kingdom in the sky, Lesotho is a small, developing country crossed by mountain ranges and rivers, making it difficult to get electricity to rural regions.

What is Lesotho's new mini-grid?

The pilot mini-grid and those of the planned larger portfolio are solar PV hybrids with battery storage and limited LPG backup generation. The hybrid nature of the design is to ensure 24-hour, year-round electricity supply, including Lesotho's harsh winters.

Will Lesotho be able to pilot a hybrid solar PV mini-grid?

Successful pilot hybrid solar PV mini-grid in Lesotho paves way for a further 10 mini-grids that will provide first-time energy access to 30,000 people and clean power to seven health clinics.

Will edfi electrifi invest in Lesotho mini-grid portfolio SPV?

Brussels, 6 January 2022: EDFI Electrifi, REPP, and 1PWR have reached financial close on Africa's second largest project-financed mini-grid transaction. The equity-and-debt investment into the project vehicle, Sotho Minigrid Portfolio SPV, will fund the construction of a portfolio of 11 mini-grids in Lesotho with a total capacity of 1.8MW.

Why did onepower move to Lesotho?

The move coincided with OnePower's successful bid to develop the first utility-scale solar project in Lesotho, a 20-megawatt project that will sell electricity to Lesotho's central grid in addition to OnePower's minigrid work. OnePower expects that project, named Neo 1, to start delivering power to Lesotho's central electric grid next year.
