Lesotho: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

We want to be the preferred energy solutions partner for all commercial and industrial customers. We have a relentless focus on adding value to our customers" businesses by understanding and meeting their needs. Working closely with customers, from agriculture to mines, we tailor our energy solutions to their specific needs.
