

#### Who is LS Eco Energy?

From right,Koo Bon-kyu,...LS Eco Energy is Vietnam's No.1 cable maker. Based on our accumulated technology and capabilities,we will accelerate the preoccupation of solar power,on/offshore wind power markets in the ASEAN region and contribute to the establishment of global industrial infrastructure by expanding the high-speed communication market.

#### Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.

Will Lithuania switch from fossil fuels to electricity?

Lithuania would switch from fossil fuels to electricityfrom renewable energy sources (RES),generate electricity for domestic needs,to produce hydrogen,and export not only energy,but also higher-value sustainable products.

Should Lithuania produce electricity by 2030?

By 2030,Lithuania should not only produce electricity for domestic use,but also create the conditions for the development of a hydrogen industry and the export of residual energy.

How much electricity does Lithuania use per year?

Lithuania currently consumes about 11 terawatt hours(TWh) of electricity per year, and by 2050 to reach carbon-neutrality this demand could reach 74 TWh per year.

What will happen if electricity generation peaks in Lithuania?

Peaks in electricity generation will lead to the power-to-gas production of cheap green hydrogen and synthetic fuels. By 2030,1.3 GW of hydrogen production capacity from electricity generation facilities is planned to be built in Lithuania, and by 2050 the total hydrogen production capacity will reach 8.5 GW.
