

# Lithuania ub solar energy

What percentage of Lithuania's electricity is renewable?

In 2016, it constituted 27.9% of the country's overall electricity generation. Previously, the Lithuanian government aimed to generate 23% of total power from renewable resources by 2020, the goal was achieved in 2014 (23.9%). Renewable energy in Lithuania by type (as of 2022):

Can Lithuania achieve 100% renewable electricity by 2050?

In support of the 100% renewable electricity target by 2050, the government is encouraged to design a long-term renewable energy strategy for Lithuania, which would analyse the electrification of end-uses, notably heat, and an assessment of system integration needs across sectors.

How many solar power plants are there in Lithuania?

As of 2012, Lithuania has 1,580 small (from several kilowatts to 2,500 kW) solar power plants with a total installed capacity of 59.4 MW which produce electricity for the country, and has an uncounted number of private power plants which make electricity only for their owners.

Why should Lithuania invest in solar energy?

To be an active partner of society, politicians and business, creating a suitable and sustainable environment for the development of solar energy in Lithuania. We unite solar energy market players to inspire, encourage and help Lithuania to use solar energy as a clean, renewable source of energy, ensuring energy independence and a secure future.

What is the Lithuanian Confederation of renewable resources?

The Lithuanian Confederation of renewable resources successfully pursuing its goal of promoting the wider use of renewable energy sources in the energy sector in accordance with sustainability criteria.

Will Lithuania achieve a climate-neutral energy sector?

Lithuania closed the Ignalina Nuclear Power Plant in 2009 and currently operates synchronously with the Russia-Belarus power system, though a de-synch is planned in early 2025. To achieve a climate-neutral energy sector, Lithuania will have to more than triple the amount of renewable energy generated.
