mSolar was created to meet the market demand for an attractive, high-quality, photovoltaic panel imported and sold by an American company. American ownership guarantees more reliability and comes with a stronger warranty than other import brands.

TXI10-400108BB has solar cells half the size of those installed in conventional panels. The main benefits are decreased power loss, improved longevity and better low-light performance. As a result, the panel achieves an impressive efficiency of 20.48%.

Power (measured in watts) and efficiency (how well panels convert sunlight to electricity) are some of the most common metrics used to compare solar panel products. While they are not the only means of comparison, they are important determinants in how much electricity you can produce with a solar panel system.
