

How much energy does Macao use?

The results show that the Macao's energy consumption and its related GHG emissions were 32,700 Terajoules(Tj) and 3.70E+06 t CO<sub>2</sub>e. in 2010,increased by 31.10% and 100.34% over those of 2000,respectively.

How has Macao changed its energy structure?

Since 2005,Macao adjusted its energy structure and began to increase the share of imported electricity; as a consequence,indirect GHG emissions,mainly embodied in imported electricity,grew steadily and quickly exceeded direct emissions in 2008 and finally reached a record high of 2.35E+06 t CO<sub>2</sub>e. in 2010.

Why is Macao a net importer of embodied emissions?

The economic scale effect and energy structure change were identified as the main driving factors of Macao's increasing energy-related emissions,while trade structure and embodied emission intensitycontributed to make Macao a net importer of embodied emissions. However,some variations can be seen during the period concerned.

How many GHGs does Macao emit a year?

The second highest GHG emissions were from gas oil and diesel,which is also used by local power plants. Along with the amount of gas oil and diesel consumed by Macao,the GHG emission first grew from 3.01E+05 t CO<sub>2</sub>e. in 2000 to 6.11E+05 t CO<sub>2</sub>e. in 2005,then declined annually to 4.65E+05in 2010.

What is energy in Macau?

Energy in Macau is related to all of the type of energy and its related infrastructure used in Macau,China. Energy-related affairs is administered under the Secretariat for Transport and Public Works of the Government of Macau . Macau import its natural gas supply from Hengqin Island in Zhuhai,Guangdong.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory,which focuses on optimising clean energy use and production,Zhang believes expanding the use of natural gas poses major problems,especially in the city's older districts. "Many buildings and [much of the]infrastructure in Macao are outdated.

The imperative for immediate solutions to slash emissions and offer affordable low-carbon energy alternatives during the transition journey is undeniably real. Gas flaring, in particular, severely impacts climate, health, and the ...
