

This proof-of-concept project started in November 2014. The RENAMA and Energy Unlimited team, with remote advice from volunteer student consultants of Namyang Business School, are helping community-based groups establish private business centres in pilot communities. The concept is as follows: the businesses are located in areas that are typically deprived of ...

Malawi is one of the least electrified countries globally currently at 11% overall, with 42% of the urban and only 4% of the rural population connected to electricity. In terms of energy supply, the Malawi Energy Policy indicates that approximately 85% of energy comes from biomass largely exploited in a non-sustainable manner.

On Friday, October 25, Kenya's Energy Cabinet Secretary, Opiyo Wandayi, announced a new technical team to help Malawi structure a government-backed fuel importation deal. This initiative comes as Malawi and Zambia face severe fuel shortages. Both countries discuss replicating Kenya's successful model for direct fuel imports from Gulf producers.

The project aims to disseminate over 8,000 improved energy efficient cookstoves to homes in Malawi. The stoves are more efficient and use less wood for household cooking and heating than traditional stoves. Malawi is classed by the United Nations as a Least Developed Country (LDC). The economy is heavily based on agriculture, and it has a largely rural and rapidly growing ...
