What is solarsea?

SolarSea is the first and the only time-tested commercial solar PV solution for the sea. Swimsol has worked on the world's first floating solar solution for the sea since 2009. All of the components are marine-grade, specifically for tropical sea environment.

What is solar PV on a resort island?

Solar PV on a resort island is a clear sustainability message to your clients and partners. Swimsol provides a unique solution to achieve desired solar production capacity - floating solar powerplant at sea (offshore solar). SolarSea produces 5-10% more energy due to natural cooling at sea.

What is rooftop solar for Islands?

Rooftop solar for islands. Swimsol provides affordable and durable marine floating & rooftop solar PV systems for the tropics, where land space is limited. We make solar energy a hassle-free experience by handling all the tech & maintenance. We work with ultra-luxury resorts and small businesses alike - always aiming to provide great service.

What is Swimsol solar powerplant at sea?

Swimsol provides a unique solution to achieve desired solar production capacity - floating solar powerplant at sea (offshore solar). SolarSea produces 5-10% more energy due to natural cooling at sea. Swimsol technology is already competitive in islands and tropical regions using diesel for power.

Where are solar-diesel hybrid systems made?

System components are pre-assembled by Swimsol in Austria. To ensure system quality and a hassle-free client experience - our team delivers & installs the systems on-site. Our solar-diesel hybrid integrates seamlessly into island grids.
