Reduce your carbon footprint and lower your electricity bills with energy-efficient smart lighting. Our solutions allow you to dim or turn off lights remotely, ensuring that you never leave lights on when they're not needed.

Whether it's revolutionizing residential living, enhancing commercial spaces, or optimizing industrial processes, home-automation.id remains at the forefront of Malta's smart home and automation revolution, poised to lead the way towards a brighter, more intelligent tomorrow.

Maltese households could have access to smart home energy management systems to automatically optimise energy use - turning off appliances when they're not needed or shifting energy-intensive tasks to periods when electricity is cheaper.

This includes cleaning, cooking, ordering food online, managing solar power utilization and energy storage. The smart home will also manage electric vehicle charging, control and optimise home climate, and even exchange information with neighboring smart homes.
