

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

What is Ewa's vision for Malta's power sector?

EWA's vision for Malta's power sector foresees sustained growth of generation from renewable sources, powered by indigenous onshore solar PV installations, large-scale offshore renewable technologies, such as floating wind and solar, and green energy imported over interconnections with neighbouring countries.

Could bio-methane be a key factor in Malta's future power sector?

Hydrogen technology and bio-methane could also play an important part in Malta's future power sector depending on international developments of these two clean fuels.

Flexibility for the energy ...

Working as a redundant power backup. This product is designed for 1+1 redundancy power backup project with cost efficiency. Integrated with two sets of UPSs, this backup power system provides higher reliability than one UPS cloud When AC mains, master UPS and slave UPS are normal operated, master UPS will provide power to the connected loads.

Melita Power Diesel markets, sells, and services complete power solutions for marine and industrial propulsion and power plants. We also represent and are the official distributors for Rolls Royce Power Systems, MTU and Detroit Diesel Engines both in Malta and in Greece.

Interconnect Malta Ltd. (ICM) has been entrusted the responsibility to implement two Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network. BESS is essentially a group of large batteries configured to store and dispatch electrical energy with very fast response when required.

Delimara power station will host a battery energy storage system (BESS) that will store power harvested from solar and wind farms, to be released during peak demand periods. The project is proposed by the government company Interconnect Malta for a 4,900sq.m site at the Delimara plant.

Yes, the basic setup includes a battery backup of up to 9.6 kWh. The battery offers two modes - Eco Mode and Backup Mode. In Eco Mode, it prioritises using solar energy for immediate needs and stores excess energy, while in Backup Mode, it conserves stored energy for potential outages, limiting regular consumption from the battery.
