What are marine solar panels?

These marine solar panels are suitable for all yacht and boat applications. They can also be used on off-shore platforms, buoys and life-rafts. Fully encapsulated with an extremely resistant protective film on the front and back. They can be walked on when mounted on a firm solid deck or wheelhouse.

What are the different types of marine solar panels?

Available in 5 models from 12 to 80 watts for 12v systems. Thin, lightweight, water and weatherproof, semi flexible marine solar panels with high output even in low light conditions. German manufactured for reliability, zero maintenance and easy installation. Can be walked on if installed on a solid surface.

What is a marine solar panel kit?

Solar panel kits on this page are rated up to 130W and are meant for boating and marine applications. If you want to stay away from shore power then a marine solar panel kit is just what you need. Unlike a generator, solar panels are quiet, environmentally friendly and have no on-going costs.

Are marine solar panels worth it?

Marine solar panels can give you more freedom to explore without having to refuel, making it worth paying solar panel prices for the ability to run all your gear with just sunlight. You can even use solar energy to power the engines of some boats, letting you cruise the high seas indefinitely.

Why should you use marine solar panels?

It is important to use marine solar panels to ensure that you have a system designed to withstand the harsh conditions at sea. Flexible solar panels can be used to create a flush finish and can even be walked on, or solid framed glass panels can be used for a higher power density and for extra mounting options.
