How many grid-connected solar systems are in the Marshall Islands?

As a result, the company has moved cautiously towards adopting grid-connected solar systems that do not include energy storage. So far it has only allowed five grid-connected solar installations without storage. Two 53 kWp and 57 kWp systems are at the College of the Marshall Islands. The others are a

What are the main sources of energy in the Marshall Islands?

MEC,KAJUR,the College of the Marshall Islands and the University of the South Pacific,all carry out capacity building in support of energy activities. Most of the primary energy supply (90%) comes from petroleum,with biomass used for cooking accounting for nearly all the rest.

How many kWp solar systems are in the Marshall Islands?

Two 53 kWp and 57 kWp systems are at the College of the Marshall Islands. The others are a 10 kWp system at the fisheries base, a 30 kWp system at the University of the South Pacific campus and a 209 kWp system at Majuro hospital. MEC intends to move cautiously before allowing a major expansion of grid-connected solar generation.

Should a modular solar system be financed by the Marshall Islands Development Bank?

The preferable scenario in the RMI would be to create a standardised modular design prequalified for financing by the Marshall Islands Development Bank. Any requirement for a detailed technical review of a proposed installation is thereby eliminated. That way, home owners or solar PV installers will know in advance exactly what will be installed.

How can MEC and the College of the Marshall Islands work together?

The College of the Marshall Islands,the MRD Energy Planning Division and MEC need to work together to develop courses that be sustained in the long term. They would train local people to install and maintain the types of renewable energy equipment being used in the RMI. Existing technical training is in English only.

Does the Marshall Islands support the Irena mandate?

The Marshall Islands fully supports the IRENA mandate and will continue to join other countries in our global effort to promote renewable energy. Across the Pacific,small island states face daunting costs for fuel imports and recurrent risk from global oil price volatility.
