Our Mission Our mission at BAOLA ENERGY is to be the premier oil and gas company in Sub-Saharan Africa, providing reliable and sustainable energy solutions. We are committed to leading the way for our customers, employees and communities by investing in innovative technologies and utilising our resources responsibly. We strive to have a positive impact on the people

DUBAI, UAE -- Today at COP28, the U.S. Department of Energy (DOE) Deputy Secretary of Energy, David Turk, and Mauritania's Minister of Petroleum, Mines, and Energy (MPME), Nani Ould Chrougha, signed an historic Memorandum of Understanding (MOU) on clean energy cooperation. This MOU will facilitate cooperation for deploying clean energy ...

Completion of Feasibility Study on Green Hydrogen Project in Mauritania . Confirms world class potential, outlines first phase planning for domestic offtake and export development . Chariot, the Africa focused transitional energy group, is pleased to announce the completion of the Feasibility

Chariot, the Africa focused transitional energy group, announced the completion of the Feasibility Study for the large-scale green hydrogen project "Project Nour" in Mauritania ...

Chariot, the Africa focused transitional energy group, announced the completion of the Feasibility Study for the large-scale green hydrogen project "Project Nour" in Mauritania which has now been presented to the Government of Mauritania.

is a logistics company, who provides all logistics services in Mauritania including: sea freight, air freight, road freight, oil & gas services, customs clearance, vessels consignment, stevedoring, Delivery Services, Door-to-door to Mauritania. BSMG group plays also a leading role in the field of Oil & Gas and Mining Industries in Mauritania.

This project, co-owned by Chariot Green Hydrogen and TE H2--a partnership between TotalEnergies and EREN Group--has the potential to position Mauritania as a leading green hydrogen producer on the African continent. The study, which builds upon a pre-feasibility study completed in 2022, confirms the project's world-class potential.

GreenGo Energy has filed an application to Ministry of Petroleum, Energy and Mines in Mauritania for the development of one of the world's largest green energy parks. Megaton Moon will through a unique architecture and strategic location to the capitol enable truly transformative potential for Mauritania in terms of socioeconomic, green ...

Mauritania, whose installed capacity stood at 626 MW at the end of 2021 (81% of which is oil-fired) signed

several agreements to develop hydrogen projects in recent months. In September 2022, Total Eren and Chariot agreed to start feasibility studies in order to develop the 10 GW Nour green hydrogen project.

We are helping our clients and partners by delivering services that transform the way they do business in Mauritania. PHI Group Mauritania is focused on Business Consulting, Business Management, Project Management and sub-contracting within the following industries: Energy, Telecoms, Oil & Gas, Agriculture, Civil works and Medical devices ...

Mauritania intends to conditionally reduce its greenhouse gas (GHG) emissions by at least 92% by 2030. In 2020, the country adopted a national strategy to transform its energy sector and aims to increase the share of renewables in its energy mix to 60% by 2030, in line with its nationally determined contributions (NDCs) under the Paris Agreement.. To this ...

Mauritania, with its abundant wind and solar energy, has committed to the African Green Hydrogen Alliance and the UN's High-Level Champions for Climate Action. In May 2021, a Memorandum of Understanding was signed to develop the 30GW AMAN green hydrogen project, which is estimated to increase the country's GDP by 50% by 2030.

Chariot, in partnership with TE H2, has completed the Feasibility Study for Project Nour in Mauritania. With up to 10 GW of electrolysis capacity, the project aims to be one of the largest green hydrogen initiatives globally.

This new IEA report - the first focusing on Mauritania - explores the potential benefits to Mauritania of developing its renewable energy options and includes an analysis of the water requirements of hydrogen and the potential for expanding potable water availability through seawater desalination.

Chariot Transitional Power is focused on providing competitive, sustainable and reliable energy and water solutions across the continent through building, generating and trading renewable power. Chariot Green Hydrogen is partnering with Total Eren and the Government of Mauritania on the potential

Mauritania boasts a strategic geographic location, spanning over one million square kilometers with a 754-kilometer coastline. Despite its predominantly arid desert landscape, Mauritania possesses a wealth of renewable energy resources (solar, wind and wave), as well as natural gas fields in its offshore territory.
