(ESPCs) Utility Energy Services Contracts (UESCs) ESPC ENABLE Power Purchase Agreements (PPAs) ESPCs are one of several vehicles that allow agencies to fund energy improvements without up-front capital costs or special appropriations A-17

By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and...

Agencies should use this document and all of FEMP's ESPC resources to help them award high-quality and high-value ESPC task orders (TOs). FEMP ESPC guidance, contract document templates and examples, and other informational resources are available at . .

Energy savings performance contracts (ESPCs) allow federal agencies to procure energy savings and facility improvements with no up-front capital costs or special appropriations from Congress. An ESPC is a partnership between an agency ...

Mauritius has an Exclusive Economic Zone (EEZ) of 2.3 million square kilometres including the Chagos region and a continental shelf of 396,000 square kilometres co-managed with the Republic of Seychelles. With such a vast EEZ, the ocean sector is being developed as a major pillar for economic development.

The Federal Energy Management Program (FEMP) offers resources to help federal agencies implement energy savings performance contracts (ESPCs). ESPC resources are listed by essential education, phases of the ESPC process, and general information. ESPC case studies and training are also available.

One of the outcomes of this project has been the development of a concept for a risk-alleviation facility for Energy Services Companies" (ESCOs) to drive private sector investments and implementation of energy efficiency (EE) projects through Energy Performance Contracting in Mauritius, the Mauritius ESCO Guarantee (MEG).

Under ESPCs, private contractors finance the up-front costs of energy improvements. Agencies then repay contractors from the savings, such as those resulting from lower utility bills. The seven agencies GAO reviewed have used more than 500 ESPCs for projects, such as installing energy-efficient lighting or power generation projects.
