

Micro grid supplier Saint Helena

What is a connect Saint Helena microgrid?

The agreement with Connect Saint Helena Ltd includes a microgrid for the South Atlantic island that combines a 568 kWp/500 kW solar farm; a three-turbine, 2.7 MW wind farm; and a 3.2 MWh/3.5 MW battery.

Why should you use microgrids?

Go beyond the grid with cheaper, cleaner, and more resilient on-site energy from the industry leader in microgrids. Our microgrids deliver results for your organization, with optimized on-site energy resources that provide cost savings, lower emissions, and enhanced resilience.

What if a utility outage is a microgrid?

In the event of a utility outage, our microgrids can operate independently (or "island") from the grid and ensure critical operations stay online. Scale manages everything from microgrid design and construction to ongoing operations and maintenance, making a complex process headache-free.

Does St Helena have double-glazing?

You can see the 2017 figures (right). St Helena households and businesses have also adopted a wide range of energy saving measures, driven perhaps by the very high cost of electricity on the island (in 2014 it was up to £0.42p per kWh, depending on consumption). Double-glazing is, however, uncommon on St Helena - it is rarely cold.

The St. Helena project started in or around 2000 when three Lagerwey 18/80 turbines were installed on the island. In 2009 WES increased the number of turbines to a total of six by adding three WES80 80kW turbines. In 2014 another six turbines doubled the wind capacity on the island of St. Helena to twelve wind turbines.

In April 2018 the Government of St Helena announced it had chosen a supplier to provide a renewable energy solution for St Helena, aiming for 100% renewable electricity by 2027. After lengthy contract negotiations it was announced on 29 th May 2020 that an agreement had been signed with PASH Global .

As the largest power generator, and the largest supplier of wind, solar and other renewable energy, we are one of the few firms in the market with the breadth and depth of competencies to act as a single interface for resilient microgrid ...
