

Energy access for three million people: Transforming lives in off-grid communities previously dependent on polluting and unsafe energy sources.. Pioneering regulatory support: Supporting the Government of ...

BGFA is launching its second Call for Proposals (BGFA2) inviting interested off-grid energy companies to compete for funding with the aim of engaging them to develop new sustainable businesses and thereby accelerate access to affordable and clean off-gr

In Mozambique, there is a region where some consumers consider the mini-grid to be common property, and they are not always convinced or well-informed of the necessity to pay to cover expenditures. For instance, if mini-grids are powered entirely by renewable energy (wind, solar or hydro), the public may believe the service should be supplied ...

15 September 2021 - The Government of Mozambique approved in the Council of Ministers, by Decree, the Regulation for Off-Grid Energy Access. This regulation is the result of the Government's efforts to recognise the importance of the sector to catalyse rural socio-economic development, leveraging private sector investment and improving the living conditions of ...

Background This map was created as part of the GIZ off-grid energy program in Mozambique. It is intended to support the development of the off-grid sector, by providing improved access to data and market intelligence, to both mini-grid and solar ...

In April 2022, GRID3 (with support from ICAP) began working with stakeholders to produce customised GIS-based maps that can be used for microplanning in Mozambique's COVID-19 vaccination campaigns, as well as for routine immunisation activities. "Microplanning" refers to the process in which health workers plan how to deploy resources--including mobile ...

GreenStruxure joins forces with energy advisory company on microgrids for medium-size buildings. GreenStruxure, the joint venture between Schneider Electric and private equity firm Huck Capital, has formed a microgrid partnership with a Texas-based retail energy advisory service.

Abstract: This article introduces the application of the multi-function energy meter in a farm in Mozambique and the solution of energy management system. The system adopts intelligent ...

Mozambique's off-grid energy landscape, in general, and on community energy uptake. The study finds that the regulation sets the foundation for off-grid energy uptake through increased confidence and investment in both the off-grid energy market and government institutions. However, challenges remain such as the transparency of roles and

SNV BRILHO is a part of a five-year program aiming to transform Mozambique's off-grid energy market, working to provide clean and affordable energy solutions to the country's off-grid population. BRILHO's overall goal is to improve and increase energy access for people and businesses, leading to money saving, better well-being and livelihood opportunities for the low ...

This map was created as part of the GIZ off-grid energy program in Mozambique. It is intended to support the development of the off-grid sector, by providing improved access to data and market intelligence, to both mini-grid and solar ...

an on-grid electrification program would be unrealistic. Off-grid electrification offers a practical and cost-effective way to electrify significant off-grid populations in Mozambique. Additionally, the demand for electricity is steadily increasing in Mozambique and will increase further with greater industrialization of the country. The

The BGFA Country Programme for Mozambique, the related Funding Window and this specific Funding Lot have been designed in close cooperation with the Mozambican Energy Fund (FUNAE), which has contributed substantially to off-grid energy access over the last 20 years.

According to Vivian Vendeirinho, President of AMDA (Africa Mini-Grid Developers Association) and CEO of RVE.SOL: "The new regulation allows for decentralised renewable energy providers to build mini-grid systems that will provide reliable, sustainable and affordable electricity to underserved rural communities in Mozambique.

The Beyond the Grid Fund for Africa (BGFA) will launch a call for proposals from micro-grid developers in Mozambique later this month. BGFA will provide total funding of EUR6.7m (\$8m) to projects over a four-year period. The projects will be developed under a pilot licensing framework developed by Mozambique's Energy Fund.

GreenStruxure joins forces with energy advisory company on microgrids for medium-size buildings. GreenStruxure, the joint venture between Schneider Electric and private equity firm Huck Capital, has formed a ...

The entry of the Beyond the Grid Fund for Africa is an excellent step for Mozambique's energy infrastructure and to connecting its rural communities to affordable and sustainable sources of energy,"" says Mette Sunnergren, Swedish Ambassador to Mozambique. ""The model, which has been proven to work in Zambia, has been adapted to suit ...
