

Mission energy Greenland

Who is Mission Energy?

Mission Energy is an expert in developing solar and storage solutions for nonprofit organizations so they can focus on advancing their mission. We help plan and implement energy projects in low income communities, churches, synagogues, schools, hospitals, and other nonprofit organizations. Why do we care?

What is the primary energy mix of Greenland?

As presented in Fig. 2, the primary energy mix of Greenland changes notably between 2019 and 2050. In the reference scenario, oil constitutes around 80% of the primary energy consumption, with the rest being supplied mainly by hydropower.

What is Greenland's domestic energy demand?

All scenarios include Greenland's domestic energy demand. The list of scenarios is as follows: "Steady Europe": In 2030, 1.65% of European demand for liquid hydrocarbons is included, in addition to 5% of European demand for e-ammonia and e-methanol. In 2050, 10% of the demand for e-FTL, e-ammonia, and e-methanol is supplied.

Is Greenland a fuel synthesis hub?

5.2. Greenland as a fuel synthesis hub Studies have shown that e-fuels and e-chemicals are expected to be an essential part for the defossilisation of industries such as steelmaking [72,73], cement, chemical industry for e-ammonia, e-methanol, and industry-wide [76,77], and long-range transportation [78,79].

How much wind power does Greenland have?

The total onshore wind power capacity potential on Greenland is 333 GW el, with 1487 TWh el generation potential, assuming 20% of ice-free area would be available, based on . The wind power generation profile is determined by employing a method of weighted averages for half of the ice-free locations with the most favourable wind conditions.

Mission Energy is an expert in developing solar and storage solutions for nonprofit organizations so they can focus on advancing their mission. We help plan and implement energy projects in low income communities, churches, synagogues, schools, hospitals, and ...

Greenland: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Nukissiorfiit is a government-owned Greenland energy company. Nukissiorfiit means "where energies are created". The company supplies most of Greenland with electricity, water and heat. Most of the electricity is produced by hydro power such as the Qorlortorsuaq Dam. 70% of Greenland's energy is
