

Mobile phone with solar generator

Can You charge a mobile phone with solar power?

Charging your mobile phone ... with solar power works in one of two ways: A solar panel charges a rechargeable battery, that in turn charges your mobile. This means you can charge your phone even when there is no sunlight- at night for example - so long as you've charged your battery during the day.

Where can I buy portable solar panels?

Portable solar panels at Argos. Use the sun's power to charge your devices on the go with portable solar panels. Order online today for fast home delivery.

What is the best portable solar generator?

Featuring rectangular cell geometry. Solar Charging capacity is the ultimate limit in the energy production capability. The Apollo's is an incredible 4.4 kW, the fastest in any portable solar generator. AC Charging Speed is also blazing fast, for when the grid's available.

How do solar generators work?

Solar generators work in a similar way to standard gas generators, but they use energy from the sun as opposed to fuel. Using a solar panel, solar generators take in power from the sun, then store the power in their integrated batteries. The power is converted to usable AC power, allowing you to charge your devices.

Do solar generators need a portable design?

If you're taking your solar generator on the go, a portable design is essential. Solar generators are often taken to remote locations, so a compact and lightweight design will add to the convenience. Many come with a foldable handle for easier transportation.

Can a solar panel be used as a power station?

Coupled with a portable power station, some of the more powerful panels in our list can be used to keep garden sheds, polytunnels or off-grid campsites thrumming with a limited supply of free electricity, even once the sun goes down.
