As a major player in Monaco's energy transition, SMEG manages the distribution, production and supply of energy throughout the Principality. It also maintains and operates public lighting installations. Thanks to the energy supplied by its subsidiary SMA's waste recycling centre, SMEG also manages an urban heating and cooling plant, seaWergie.

In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy produced by the sun's rays to heat water.
