

A giant solar power station has been inaugurated on the roof of Monaco's Grimaldi Forum, marking a significant milestone in the Principality's energy transition. Eventually, electricity generated from the station will be ...

"MER's goal is for Monaco to become one of the first states to have 100% green electricity production capacity, equivalent to the consumption of its territory," underlines Marie-Pierre Gramaglia, Counsellor of the Ministry of Equipment, Environment, and Urban Planning.

In line with this objective, Monaco Energies Renewables has just acquired eight photovoltaic parks, totalling a production capacity of 39 MW<sub>pec</sub>. This has been distributed in seven departments in the south of France.

This website is an interactive map that allows users to easily identify every roof in Monaco, its potential solar resource, the exploitable area on which photovoltaic panels could be installed, and the possible annual electricity production.

"M.E.R. aims to make Monaco one of the first States to have 100% green electricity production capacity, equivalent to consumption in its territory," stated Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban Development.

"The facilities, which are located in C&#244;te-d'Or, Haute-Vienne, Landes and Gard, will generate a total of 65,000 MWh per year, or around 12% of the Principality of Monaco's electricity consumption." By the end of 2021, M.E.R. will own 15 photovoltaic power stations.

During a press conference held late in the morning on Thursday 29 June, Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban Development, presented two aspects of Monaco's investment in solar power: a solar resource map for the Principality and the launch of a joint venture by the Prince's Government and SMEG to ...
