

Will Montenegro adopt a re-newable based district heating system?

Montenegro finalized the adoption of a complete package of updated energy labelling rulebooks, as incorporated into the Energy Community legal framework by the 2022 Ministerial Council. Zabljak municipality is exploring options for establishing a re-newable-based district heating system.

Does Montenegro have an energy efficient home?

In 2023, the project Energy Efficient Home continued to support households to purchase heat pumps with interest-free loans. Montenegro is still finalizing its draft NECP, which must harmonize the 2030 energy efficiency targets with the 2030 targets set by the Energy Community.

Does Montenegro have a national energy and climate plan?

Montenegro is still finalizing its draft National Energy and Climate Plan (NECP). Montenegro has not defined the 2030 climate target in its national legislation, nor in the draft NECP. It should align with the 2030 targets set by the Energy Community. There is a legal basis for the national inventory system.

Why should Montenegro focus on implementing the electricity integration package?

Montenegro should focus on the transposition and implementation of the Electricity Integration Package as a precondition for the coupling of its day-ahead market. Montenegro progressed with amendments of the Energy Efficiency Law and new labelling regulations.

How has Montenegro progressed?

Montenegro progressed with amendments of the Energy Efficiency Law and new labelling regulations. Montenegro should submit the draft NECP to the Secretariat with a targeted approach to coal phase-out. A draft Law on Information Security transposing the NIS2 Directive was drafted in 2023. It should be adopted in the next reporting period.

Which energy projects have been subjected to an EIA in Montenegro?

Montenegro has not provided a list of energy projects that underwent screening and were subjected to an EIA. The development of the EIA, which should include an appropriate assessment for the Komarnica hydropower project, located within a candidate Emerald Site and the Dragižnica and Komarnica Nature Park, was delayed.

Montenegro: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS).

Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

On 31 August 2024, the Law on renewable energy usage (Renewable Energy Law) came into force in Montenegro. For the first time, it comprehensively regulates the use of renewable energy sources and introduces new concepts such as market premiums, auctions, strategic partnerships, and renewable energy communities.

The Balkan country on the Adriatic Sea has one coal-fired power plant which provides half of the country's electricity - and in turn, 80-90% of its CO₂ emissions, according to Montenegro's energy minister Marko ...

Relyon's AI-powered battery management system extends the life of new and second life batteries by up to 30 years. We can do this because we've created a new type of battery brain. That brain--a combination of AI software and light hardware--allows you to store more power, for longer, at a lower cost.

The Article (in Montenegrin and English) prepared by Dajana Drljević and Aleksa Janković, Associates from the JPM Montenegro office, outlines key aspects of the law including detailed regulations on planning renewable energy shares, ...

The Balkan country on the Adriatic Sea has one coal-fired power plant which provides half of the country's electricity - and in turn, 80-90% of its CO₂ emissions, according to Montenegro's energy minister Marko Perunovic.

Montenegro: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Energy Development Strategy of Montenegro sets out objectives and defines mechanisms for the transition from the current energy system to a safe, competitive and environmentally acceptable energy paradigm by 2025. It also provides guidelines for

The Government of Montenegro has approved the Energy Balance for 2025, a crucial document outlining the country's energy production and consumption plans for the upcoming year. The Energy Balance covers key energy sources, including electricity, coal, oil, oil derivatives, and biofuels.

Montenegro is still finalizing its draft NECP, which must harmonize the 2030 energy efficiency targets with the 2030 targets set by the Energy Community. The December 2022 amendments to the Law on Efficient Use of Energy transposed the amendments to the Energy Efficiency Directive (EED), including

On 31 August 2024, the Law on renewable energy usage (Renewable Energy Law) came into force in Montenegro. For the first time, it comprehensively regulates the use of renewable energy sources and ...
