

Why should Montenegro focus on implementing the electricity integration package?

Montenegro should focus on the transposition and implementation of the Electricity Integration Package as a precondition for the coupling of its day-ahead market. Montenegro progressed with amendments of the Energy Efficiency Law and new labelling regulations.

Does Montenegro have an energy efficient home?

In 2023, the project Energy Efficient Home continued to support households to purchase heat pumps with interest-free loans. Montenegro is still finalizing its draft NECP, which must harmonize the 2030 energy efficiency targets with the 2030 targets set by the Energy Community.

Does Montenegro have a gas market?

Montenegro does not have a gas market. REMIT Regulation (EU) 1227/2011 is in place. Despite the non-existing gas market, Montenegro adopted the supply rules for natural gas. Initially scheduled for 2019, the adoption of the new Law on Cross-Border Energy Infrastructure projects, intended to transpose Regulation (EU) 347/2013 is pending.

Will Montenegro adopt a renewable based district heating system?

Montenegro finalized the adoption of a complete package of updated energy labelling rulebooks, as incorporated into the Energy Community legal framework by the 2022 Ministerial Council. Zabljak municipality is exploring options for establishing a renewable-based district heating system.

Does Montenegro have a national energy and climate plan?

Montenegro is still finalizing its draft National Energy and Climate Plan (NECP). Montenegro has not defined the 2030 climate target in its national legislation, nor in the draft NECP. It should align with the 2030 targets set by the Energy Community. There is a legal basis for the national inventory system.

How has Montenegro progressed?

Montenegro progressed with amendments of the Energy Efficiency Law and new labelling regulations. Montenegro should submit the draft NECP to the Secretariat with a targeted approach to coal phase-out. A draft Law on Information Security transposing the NIS2 Directive was drafted in 2023. It should be adopted in the next reporting period.

In partnership with the EPEX Spot and BSP SouthPool, MEPX launched the day-ahead market (DAM) in Montenegro in April. Would you say it took a while but was worth it? Establishing an organized electricity market in Montenegro was never done before, so it was started from scratch, with help from the Energy Community Secretariat.

Montenegro: Many of us want an overview of how much energy our country consumes, where it comes from,

and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

The development of new energy projects in Montenegro plays a pivotal role in achieving its decarbonization strategy, fostering economic growth, reducing greenhouse gas emissions, and ensuring energy security.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Montenegro is still finalizing its draft NECP, which must harmonize the 2030 energy efficiency targets with the 2030 targets set by the Energy Community. The December 2022 amendments to the Law on Efficient Use of Energy transposed the amendments to the Energy Efficiency Directive (EED), including

Montenegro: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

In partnership with the EPEX Spot and BSP SouthPool, MEPX launched the day-ahead market (DAM) in Montenegro in April. Would you say it took a while but was worth it? Establishing an organized electricity market in ...
