

Morocco sunstore solar private limited

What is Morocco's largest solar power plant?

Morocco also built the Noor-Ouarzazate complex, the world's largest concentrated solar power plant, an enormous array of curved mirrors spread over 3,000 hectares (11.6 sq miles) which concentrate the Sun's rays towards tubes of fluid, with the hot liquid then used to produce power.

Does Morocco need solar power?

And even as it seeks to end its dependence on fossil fuels, its energy demands are rising fast. Despite these challenges, Morocco has a huge natural potential to produce solar, wind and hydropower, and has taken significant steps to realise it.

How much energy does Morocco produce from renewables?

Production of energy from renewables lagged behind a little, at closer to 20% of the country's total in 2019. But the country has come a long way. Morocco has since pledged to increase the renewables in its electricity mix to 52% by 2030, made up of 20% solar, 20% wind and 12% hydro.

Where does Morocco's energy come from?

Much of that imported energy is generated from fossil fuels. Morocco relies particularly heavily on coal power, which it is expanding along with renewables, and around 40% of electricity in the country comes from coal.

Why does Morocco import so much energy?

Morocco still imports most of its energy to meet its rising energy consumption, which increased at an average annual rate of 6.5% between 2002 and 2015. Much of that imported energy is generated from fossil fuels.

Should the Global North invest more in Morocco?

Greenpeace's Tazrouti says that the Global North needs to invest more in the countries of the Global South, including Morocco. "A lot of support is needed in southern countries and underdeveloped and poor countries that are suffering and are at the frontline of being affected by climate change," he says.
