

Mozambique noova energy systems

What is Mozambique's energy transition?

Mozambique's energy transition is based on four strategic pillars including: 1. Expanding clean energy expansion capacity through wind, hydroelectric projects and solar power plants to offset fossil fuels predominance; 2. Capitalising on green industrialisation through integrated projects around industrial corridors such as the Nacala corridor; 3.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

When did independent power projects start in Mozambique?

The first Independent Power Projects (IPPs) in Mozambique came online in 2015. These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing.

What is Mozambique's energy potential?

In this new age of industrialisation, Mozambique's energy potential places the country at the forefront of global energy investments. As it continues to develop its infrastructure and expertise in energy production, Mozambique is set to play a pivotal role in meeting future energy demands.

Is Mozambique ready for energy transformation?

As the world shifts towards cleaner and more sustainable energy, Mozambique is positioning itself at the centre of this transformation, ensuring its energy projects are both ready and fully implemented to meet the growing demands of domestic, regional and the global market.

Why is Mozambique a key player in energy development?

As it continues to develop its infrastructure and expertise in energy production, Mozambique is set to play a pivotal role in meeting future energy demands. With significant projects in the pipeline, the country's readiness and commitment to energy development make it a key player in the global energy transition.
