

Does Myanmar have a potential for solar energy?

"Myanmar has an incredible potential for solar energy, but the government still has a lot of work to do to unleash the potential and to attract foreign direct investments into Myanmar's solar industry," noted Stefano Mantellassi, Chair of the SolarPower Europe Emerging Markets Taskforce.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Who won a mini-grid project in Myanmar?

Mini-grid installation and three-year operations and maintenance contracts were awarded to two Myanmar solar companies following a tender, SolaRise Sys and Zaburitz Pearl.

How will Myanmar's economic growth affect investors?

Myanmar's economic growth is expected to rise to 6.5 percent in the 2018-19 fiscal year due to strong performance in its industrial and services sectors - and the lack of electricity is a huge turn-off for any investor.

Solar could play a big role in achieving Myanmar's energy access, renewable energy and climate change goals, as well as go a long way towards setting Myanmar firmly on a sustainable development pathway, however.

List of Burmese solar panel installers - showing companies in Myanmar that undertake solar panel installation, including rooftop and standalone solar systems. ... Sellers Solar System Installers ...
