

Namibia's energy future lies in embracing a diverse energy mix. This approach will ensure energy security, economic growth and environmental sustainability. As we move forward, it is imperative for policymakers, industry leaders and financial institutions to work together to create a robust and resilient energy system for Namibia.

Namibia is yet to follow suit. Nigeria has ratified the AfCFTA agreement, which aims to create "One Economy" and facilitate continental trade integration. The AfCFTA agreement will create the largest free trade area in the world, measured by the number of countries participating, said AU Commissioner for Economic Development Trade Tourism ...

At Friday's groundbreaking event for the 40 MW Otjikoto biomass power plant, mines and energy minister Tom Alweendo said 30 months of hard work now lie ahead to construct the plant after ten years of preparation. The biomass power plant, valued at N\$2.64 billion, is located 12 km outside Tsumeb ...

Namibia's cricket programs are experiencing consistent growth, with the game making steady strides in communities. "Our Ashburton Mini Cricket Program now has over 150,000 primary school kids playing the game. This year, we had more than 45,000 young cricketers participating in regular matches ...

As a result, Living Earth and the Capricorn Foundation are now collaborating on the PoC to bring sustainable agriculture and food security solutions to communities across Namibia. A standout feature of the Plot to Plate approach is its open-source educational video series, designed to make sustainable farming skills accessible to all.

Toyota, the largest car manufacturer, produced 10 million cars in 2022. If Tesla manages to reach the 20 million, affordable cars per year milestone within a decade, we should expect more new Tesla cars on Namibian roads perhaps more than we see Toyota manufactured vehicles. How does Namibia fit in the Tesla master plan?

This is contained in a document by the Namibian government and its green hydrogen programme, led by James Mnyupe, which was published online this week. However, securing these funds depends on innovative financing methods and effective public-private partnerships, according to the "Blueprint for Namibia's green industrialisation".

The Cube 800 comes with a pre-programmed inverter, pre-connected batteries, a battery management system and a 6kW inverter with 6500 W MPPT, and comes in a neat and compact design, which can easily be fitted under a standard table or counter. The system boasts a 10.2kWh lithium battery (expandable), is NRS 097-2 grid code compliant and is ...

Namibian footprint The event featured informative sessions led by Namdia's executive team. Amupolo emphasised the company's mandate to create a Namibian footprint in the global diamond market, while other presentations covered governance practices, strategic direction and operational activities.

Furthermore, a significant boost to the construction sector is anticipated with the commencement of the construction of a 54 MW/54 MWH utility-scale battery energy storage system. This project, led by the Chinese state-owned Shandong Electrical Engineering & Equipment Group (SDEE) and Zhejiang Narada Power Source joint venture, is set to begin ...

Developing local supply chains and fostering technological innovation across sectors can create sustainable economic growth. Namibia has the opportunity to harness green hydrogen as a catalyst for national development. However, careful planning and a commitment to long-term, diversified growth will be essential to avoid the economic pitfalls ...
