

# Nauru polaris energy

Does Nauru have an energy road map?

Currently Nauru is working on an Energy Road Map, including action plans for the development of renewable energy and energy efficiency sufficient to significantly lower imports of diesel fuel for electricity generation.

How can Nauru reduce its reliance on fossil fuels?

In order to achieve Nauru's ambitious goal of reducing the country's high reliance on imported fossil fuel by meeting 50% of its energy needs from renewable energy sources by 2015, the Nauru Government requested technical support from GIZ, SPC and IRENA in the development of a Nauru Energy Road Map in early 2012.

What is a Polaris Energy Resources project?

A POLARIS Energy Resources project creates jobs and infrastructure improvements. Polaris Energy Resources Inc. is comprised of proven leaders serving as a gateway to the global renewable energy sector.

Why is Nauru so vulnerable to solar energy?

Solar energy is the only proven renewable energy resource which could be utilised in short to medium term to reduce dependency on fuel imports for electricity generation. The country's vulnerability is also increased by its isolation from other Pacific Islands. In 2012, SPC released an energy profile of Nauru based on 36 energy security indicators.

What type of energy is used in Nauru?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Nauru: How much of the country's energy comes from nuclear power?

What does imported energy mean for Nauru?

Imported energy for Nauru means fossil fuel imports. Unambiguous records of the quantity of fuel imports, their timing and the specific type of fuel imported are vital to the determination of the Nauru energy balance.

Polaris is first and foremost a renewable energy corporation focused on all types of alternative energy and sustainability projects. We also focus efforts on the infrastructure projects required to support them.

Company POLARIS ENERGY LIMITED was founded on 09 Jul 2015 in the administrative district of People's Republic of China Hong Kong. Company has representations in Russia and Belarus. Polaris is looking into different ways of sensing, particularly in the infrared range, to enhance the HEL system's ability to acquire and track targets in unfavorable weather conditions. We are studying atmospheric propagation models and working on additional models to understand how atmospheric and weather conditions affect RAM signatures.
