

# New Energy Storage Facility Project

Where is SSE Renewables delivering its second battery energy storage system?

SSE Renewables has taken a Final Investment Decision to proceed with, and entered into contracts to deliver, its second battery energy storage system (BESS). The 150MW project is located at the site of SSE's former Ferrybridge coal-fired power station in West Yorkshire, England.

Will SSE build a new battery storage project at Ferrybridge?

For decades the Ferrybridge coal-fired power station was a prominent feature of the West Yorkshire landscape, before being decommissioned by SSE in 2016. Now SSE Renewables' plans to build a new 150MW battery storage project at Ferrybridge will provide flexible generation for Britain's national grid and a new era for the site.

How will UK energy storage demonstration projects help achieve net zero?

The four longer-duration energy storage demonstration projects will help to achieve the UK's plan for net zero by balancing the intermittency of renewable energy, creating more options for sustainable, low-cost energy storage in the UK.

What are battery storage plants?

In short, battery storage plants, or battery energy storage systems (BESS), are a way to stockpile energy from renewable sources and release it when needed. When the wind blows and the sun shines turbines and solar panels may generate more energy than needed on a particular day.

Does SSE Renewables have a battery & solar project?

SSE Renewables has almost 2GW of battery and solar projects currently in development or under construction. These technologies are key to helping SSE deliver on its Net Zero Acceleration Programme to provide the green energy we need to decarbonise. By building out more battery storage, we can get more renewable power onto the Grid.

Where is SSE Renewables located?

Located next to the former Ferrybridge coal power station, this important new project demonstrates clearly the transition to net zero while supporting new green jobs. SSE Renewables has almost 2GW of battery and solar projects currently in development or under construction.

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel Murtagh. News ...

The project also includes the development of new modern railcars for transporting the spent nuclear fuel to the consolidated interim storage facility. DOE wrapped up final testing on the 12-axle Atlas railcar last year, ...

# New Energy Storage Facility Project

The four longer-duration energy storage demonstration projects will help to achieve the UK's plan for net zero by balancing the intermittency of renewable energy, creating more options for sustainable, low-cost energy ...

About the Project. New Leaf Energy is developing a 105 MW (gross) / 4-hour battery energy storage system that will enhance the flexibility and reliability of the electric grid without creating emissions or waste products. ... The facility has ...

Starting in mid-2025, the regional grid operator will be able to dispatch up to 175 megawatts of capacity from the Cross Town Energy Storage facility. The \$100 million-plus project will feature 156 tractor trailer-like ...

Rye Development, the leading U.S. developer of pumped storage, is excited to announce it has submitted a Draft License Application to the Federal Energy Regulatory Commission (FERC) for the 287-megawatt Lewis Ridge Pumped ...

Bloomberg New Energy Finance predicts that non-hydro energy storage installations worldwide will reach a cumulative 411GW/1,194GWh by the end of 2030. That is 15 times the 27GW/56GWh of storage at the end of ...

The HPC Krummhörn project combines security of supply and decarbonisation Trial operation begins with a gas tightness test on 24 September 2024 and the planned first gas filling With the ...

SSE Renewables has taken a Final Investment Decision to proceed with, and entered into contracts to deliver, its second battery energy storage system (BESS). The 150MW project is located at the site of SSE's ...

Before the enactment of the IRA, the Section 48 investment tax credit (ITC) did not apply to standalone energy storage projects. Energy storage projects could claim the ITC ...

From the UK to the UEA and USA to Australia, Energy Digital Magazine runs through 10 of the most impressive energy storage projects worldwide. Energy storage plays a pivotal role in the energy transition and is ...
