

# New Zealand commercial solar generators

Is solar power transforming New Zealand's commercial sector?

The move to solar power in New Zealand's commercial sector is TAKING OFF! All over the country businesses and property owners are taking advantage of solar power to enhance their properties, provide long term income and reduce business overheads.

Why is commercial solar power important for New Zealand farms?

Agriculture is the backbone of our country, and it's vital for New Zealand's farms to operate sustainably. Commercial solar power systems give farms a way to lessen their reliance on non-renewable energy sources, allowing them to reduce their carbon footprint.

What is a grid-tied commercial solar power system?

Grid-tied commercial solar power systems supplement your existing main grid energy connection, allowing your business premises as a whole to run partially on clean, green solar power generated by panels on the roof. Any excess can be exported back to the grid for solar energy credits.

Where can I install solar in New Zealand?

Terms and conditions apply We've helped establish New Zealand's largest commercial solar programme, installing solar across Kiwi Property shopping centres in Christchurch, Palmerston North, Auckland and Hamilton.

How do solar panels work in New Zealand?

Most commercial buildings in New Zealand are connected to the national electricity grid. By adding PV (photovoltaic) solar panels to your building, you can generate direct current (DC) energy from the sun. This energy is then converted from DC electricity into AC (alternating current) electricity suitable for ordinary use by an inverter.

Does New Zealand have a solar system?

Most businesses in New Zealand are already connected to the national electricity grid, so most of the systems we install are grid connected. By adding PV (photovoltaic) solar panels to your building, you can generate direct current (DC) energy from the sun.

The Kubota GL9000 generator is a two-pole, silent-type, direct-coupled, single-phase diesel generator. The Kubota GL9000 generator has a capacity of 8.8kVA at 3000RPM, supplying 33.3 amps at 240 volts. The Kubota GL9000 diesel ...
