

For solar power installation in NZ, you must comply with local laws, building codes, and your electricity supplier's regulations. This includes paperwork and approvals to connect your new residential solar system to the utility grid. Reputable solar companies handle the majority of these formalities, simplifying the process.

Solarcraft, Auckland's trusted solar panel installers, provides top-notch service and energy-efficient solar systems. With over 15 years experience and a real focus on customer satisfaction, you can rely on Solarcraft for your solar project.

Solar panels are installed on your roof and produce electricity in DC current. This electricity is converted to AC current through your solar inverter and then delivered via your house's switchboard, to your appliances, such as your television, hot water cylinder, fridge and heat pump.

Investigate and research whether solar is right for your home/business - compare your power use with potential power solar panel output, use the SEANZ Solar Optimiser or Gen Less Solar power calculator. Decide if you need a battery system - if you don't use much power during the day, a battery can store your generation for use in the evening.
