

New energy company Bahamas

How will a new energy system affect the Bahamas?

Comprehensive upgrades to our country's transmission and distribution infrastructure, and switching from heavy and diesel fuels to solar power and natural gas, will create new efficiencies and reduce the price of electricity in The Bahamas. But it won't happen overnight - it will take time to upgrade our grid and to integrate cleaner energy.

What is the new energy era in the Bahamas?

It's a New Energy Era in The Bahamas. Our electricity sector requires comprehensive reform. Lowering prices, and ensuring fair prices, for Bahamian homes and businesses. Increasing the reliability of our electricity supply. Increasing hurricane resilience during this new climate era.

How does a comprehensive energy policy work in the Bahamas?

Our comprehensive energy policies work together to modernize our system and bring electricity prices down in The Bahamas. 70MW of solar power and 35MW of Battery Energy Storage Systems will be integrated into the existing grid.

How does solar power work in the Bahamas?

Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs? Island-by-island planning. Every one of our inhabited islands is different, and requires a unique set of solutions.

What is a solar energy microgrid in the Bahamas?

This initiative involves developing solar energy microgrids across the Family Islands. This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030.

Is the Bahamas ready for a sustainable future?

The Prime Minister said the choice The Bahamas faces is stark. "Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian.

We are building a new energy reality for our country - one that is cleaner, more affordable, and more reliable. Today, we are taking a very big step forward, with an RFP for significant solar energy infrastructure - up to 100MW -- in New Providence.

The Government yesterday pledged Bahamas Power & Light (BPL) and its customers will ultimately enjoy \$126m in annual savings through "desperately" needed energy reforms that "won't" happen ...
