Le projet de centrale flottante thermique Nemo, pour "New Energy for Martinique and Overseas", a été sélectionné le 8 juillet dernier par la Commission européenne.

After a 12-month audit led by the European Investment Bank, the NEMO "New Energy for Martinique and Overseas" project for the development of an offshore pilot Ocean Thermal Energy Conversion (OTEC) plant in Martinique was awarded under the NER300 programme by the European Commission.

Le mercredi 20 mars 2019, le Conseiller Exécutif de la CTM, Louis BOUTRIN, en charge de la Martinique Energy, a rencontré, à l'Hotel de la CTM, les responsables de NW Energy, en charge du projet GRESS (Grand Rivière Eolien Stockage Service).

With the 14MW Grand-Rivière wind park inaugurated last month, and further projects on the way, Martinique has been making strides towards achieving its goal of being energy self-sufficient by relying on renewable energy by 2030.

Martinique, a French Caribbean territory, is exploring the potential for geothermal energy, as part of an island-wide clean energy transition. Over the previous two decades, experts have identified two potential areas for geothermal development, with a particular focus on the southwest region of the island.

A century and a half later, the NEMO project "New Energy for Martinique and Overseas", spearheaded by
