How many CDM projects are there in Nicaragua?

Currently (November 2007), there are only two registered CDM projects in the electricity sector in Nicaragua, with overall estimated emission reductions of 336,723 tCO<sub>2</sub>e per year. One of them is the San Jacinto Tizate geothermal project and the other one is the Monte Rosa Bagasse Cogeneration Project

Does Nicaragua need a new generation power plant?

Maximum demand has increased in Nicaragua at an annual rate of about 4% since 2001, which has led to a low reserve margin (6% in 2006). Furthermore, demand is expected to increase by 6% per year for the next 10 years, which increases the need for new generation capacity.

What projects are being implemented in Nicaragua?

The Inter-American Development Bank (IDB) has several projects under implementation in the electricity sector in Nicaragua: In October 2007, the IDB approved US\$350,500 for the Support to Power Sector Investment Program. In June 2007, a US\$12 million loan was approved for the National Transmission Strengthening for Integration SIEPAC project.

What is the CNE 'indicative plan' for electricity generation in Nicaragua?

In 2003, the CNE elaborated the "Indicative plan for the generation in the electricity sector in Nicaragua, 2003-2014", which aims to provide useful insight for private investors to orient their decisions on technologies to implement in the country.

Who is responsible for transmission in Nicaragua?

In Nicaragua, 100% of the transmission is handled by ENATREL, which is also in charge of the system's dispatch. In Nicaragua, the company Dissur-Disnorte, owned by the Spanish Unión Fenosa, controls 95% of the distribution. Other companies with minor contributions are Bluefields, Wiwil and ATDER-BL.

Is there a wind power project in Nicaragua?

In December 2005, two wind-related technical cooperation activities were approved, one for the Development of Wind Power Generation in Isolated Systems and another one for a Wind Power Park Feasibility Study in Corn Island. The World Bank has currently one Off-grid Rural Electrification (PERZA) project under implementation in Nicaragua.

¡Historico hito! Nicaragua firma importante acuerdo con la Empresa China CCC (Communications Construction Company); para la ejecución del proyecto solar El Hato. Hablamos de una planta de generación fotovoltaica que tendrá la capacidad de 67.3 MW de potencia y constará de una inversión de 80 millones de dólares.

PCPC is a start up joint venture between Saudi Aramco, Marubeni Corporation, JGC and Al-Jomaih. PCPC
