What is happening in Nigeria's renewable power sector?

Increased Investments in Nigeria Renewable Power and Mini-Grid Sectors The renewable power industry has seen some new investments since the beginning of 2021. One notable project is the Ashama 200 megawatts/HR solar photovoltaic (PV) farm - the largest solar PV farm project in West Africa<sup>1</sup>.

How much money do Nigerians spend on generators & fuel?

The projects are expected to catalyse economic activities, serve health facilities and have a multiplier and transformative effect on the host communities. According to the Central Bank of Nigeria, Nigerians spend about US\$14 billion on generator and fuel annually.

Is Nigeria's electricity tariff too low?

Generally, the tariff has been criticised as being too low compared to the cost of generating power. The federal government of Nigeria has increased the tariff to attract foreign investors since 1 July 2010 in order to meet the growing concern for foreign investors into the electricity sector.

How much money does Nigeria spend on solar power?

According to the Central Bank of Nigeria, Nigerians spend about US\$14 billion on generator and fuel annually. These Solar projects are expected to be key in diversifying the nation's electricity mix, and critically reduce its electricity poverty and carbon emission footprints.

How much carbon will Nigeria's new energy projects reduce?

The REA estimates that the new projects will reduce more than 200 million metric tonnes of Nigeria's carbon emission which aligns with the NEP 30:30:30 vision; which targets to deliver 30 gigawatts of electricity with 30% renewable energy by 2030. [Click here to read more on this publication.](#)

The electricity sector in Nigeria generates, transmits and distributes megawatts(MW) of electric power that is significantly less than what is needed to meet basic household and industrial needs. Nigeria has twenty-three (23) power-generating plants connected to the national grid with the capacity to generate 11,165.4 MW of electricity.

President Bola Tinubu will today commission Nigeria's only integrated power project, the \$800 million Geometric Power Aba Limited (GPAL) in Osisioma Ngwa Local Government Area (LGA), Abia State.

The company plays a key role in the multi-million US Dollar Aba Integrated Power Project ("Aba IPP) Phase 1, being developed by the Geometric Power Group. APLE's mission is to build an efficient network to distribute power in Nigeria in line with the Electric Power Sector Reform Act.

The mastermind behind the project, Bartholomew Nnaji, also known as Barth Nnaji, is a professor of mechanical engineering and the founder and chairman of the indigenous power company, Geometric Power Limited (GPL).
