In the Central African Republic, only 700,000 people of its 4.9 million people have access to electricity and about 60 percent of the country's population live in rural areas. Electricity access to the national power grid is limited and unpredictable. This lack of electricity access has made the country vulnerable during the COVID19 pandemic. A [...]

Demographic profile. The Central African Republic's (CAR) humanitarian crisis has worsened since a coup in March 2013. CAR's high mortality rate and low life expectancy are attributed to elevated rates of preventable and treatable diseases (including malaria and malnutrition), an inadequate health care system, precarious food security, and armed conflict.

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

Amid a major fuel shortage in the Central African Republic, Energy Minister Arthur Bertrand Piri decided to requisition six Tamoil petrol stations and give three of them to ...

2019, the Government of the Central African Republic signed an African Union-mediated peace agreement with 14 armed groups. 7 CAR has a population of just over 4.7 million people (2019) with an annual population growth rate of 1.7%. 8 The

The Wagner Group, also known as PMC Wagner, [1] a Russian paramilitary organization [1] also described as a private military company (PMC), a network of mercenaries, [1] [2] and a de facto unit of the Russian Ministry of Defence (MoD) or Russia's military intelligence agency, the GRU, [3] has conducted operations in the Central African Republic since late 2018.
