Can you collect solar energy in Norway?

For example,the collection of solar energy was once regarded as gratuitous - especially in parts of the country that had a surplus of energy. Most homes in Norway are now equipped with smart meters allowing you to harvest solar energy,store it,and even sell it back to energy companies.

Is solar power a viable option in Norway?

Norwegian hydropower is currently so cheap that power companies do not consider it attractive to build solar power plants in Norway. In recent years,however,companies have started selling or leasing solar systems to private customers and businesses in Norway. Despite the low energy prices,solar power is growing rapidly in Norway.

Does Norway have solar power?

Although Norway is far north,it is quite possible to produce solar energy here. &#197;s,a small town south of Oslo,receives 1000 kilowatt-hours (kWh) per square meter annually. This is comparable to many parts of Germany,where solar power has boomed over the last 10 years.

Is solar a long-term solution for Norway?

Better still, according to Rohn, this is a solution that transcends Norway's borders: "We see solar becoming the long-term solution for the world, because it gives you abundant energy and costs have gone down rapidly." Just to be clear, Norway is far from squeaky clean when it comes to energy.
