

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

What is a DIY solar system guide?

A DIY solar system guide that teaches you everything from basic electrical rules to sizing your solar panels.

Do solar panels need a battery?

Some people also decide to pair their solar panels with a solar battery, which will store excess solar energy to be used on cloudy days or during the night time. If you have a solar battery in your system, the battery also needs to be connected to the inverter at this point. Find out more about how solar batteries are installed on our page.

How do I install a solar inverter?

Inverters convert the DC energy generated by solar panels into AC energy for household use. Choose between string inverters (cost-effective) and microinverters (panel-level optimization). Securely mount solar panels on your chosen location using mounting racks. The type of rack will depend on whether the installation is on a roof or the ground.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

What is the best angle for solar panels?

The best angle for solar panels will depend on where you are in the world. Direct south is best for most applications. Because the sun moves throughout the day, the south is the best location unless you use solar trackers. Tip: Improve solar locations with sun trackers.

Making a solar panel will not be easy, especially for beginners. Therefore, you should first analyze all the pros and cons of this process, read specialized articles, and build a concept of work. In fact, there are many videos ...
