The "MPP Solar" inverters I'm using are only capable of 60A AC and 80A charging each. Perhaps I'll try see if 1AWG or 1/0 will fit, if needed. Grounding / Bonding - I need to add that to the PV panels. I have the wire for it, just forgot to add it to the diagram. In regards to power losses, I'm not sure how I could reduce this too

much.

Inverter Surge or Peak Power Output. The peak power rating is very important for off-grid systems but not always critical for a hybrid (grid-tie) system. If you plan on powering high-surge appliances such as water pumps, compressors, washing machines and power tools, the inverter must be able to handle the high inductive surge loads, often referred to as LRA or ...
