

# One our new energy Saint Pierre and Miquelon

The 100-foot-long boat is powered by a sophisticated energy system that uses power from solar and wind, stores long-term energy in hydrogen and stores short-term energy in batteries. The Energy Observer features 2174 ...

Saint Pierre and Miquelon: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Critical Materials Monitor aims to improve understanding of supply chains essential for the energy transition, the transition to more sustainable energy. It offers insights into the critical minerals required, outlines the components of key technologies, and provides in-depth reserve, production, and trade analysis.

Du 17 au 21 mai, Energy Observer a fait escale &#224; Saint-Pierre-et-Miquelon, archipel fran&#231;ais situ&#233; au large de la c&#244;te de Terre-Neuve, au Canada. Cet arr&#234;t a marqu&#233; un moment important pour la communaut&#233; locale, qui a eu l'occasion de d&#233;couvrir de pr&#232;s les innovations technologiques embarqu&#233;es &#224; bord et de r&#233;fl&#233;chir &#224; leur propre ...

Saint-Pierre-et-Miquelon is the final stopover for Energy Observer before her final transatlantic journey back to her home port of Saint-Malo in mid-June. Setting out from the &quot;Cit&#233; Corsaire&quot; in 2017, Energy Observer has covered more than 65,000 nautical miles to date - the equivalent of circumnavigating the Earth three times.

L'Energy Observer est le premier navire au monde &#224; naviguer gr&#226;ce &#224; un mix d'&#233;nergies renouvelables et d'hydrog&#232;ne produit &#224; bord &#224; partir de l'eau de mer. Il fera escale ...
