What is Antora thermal battery?

Antora's thermal battery turns cheap, clean energy into the standard that powers global industry. Charges with surplus clean electricity to deliver cost-effective, zero-emission energy at a predictable price. Multi-day storage delivers always-on heat and power for industrial operations where downtime is not an option.

Who is Antora energy?

Antora Energy, founded by David Bierman SM '14, PhD '17, is commercializing a thermal battery that lets manufacturers use renewable energy around the clock.

What is the Palau solar battery project?

The Palau Solar Battery Project will be the largest such project in the Western Pacific. It will lessen Palau's imported fuel dependency, a major step towards its ambitious goal of 100%.

Does Palau rely on fossil fuels?

As a small island developing state, the Republic of Palau sought to wean itself off its dependence on fossil fuel for power, which accounts for 99.7% of the country's power generation. To address this issue, Palau invited Solar Pacific Energy Corporation (SPEC), Alternergy's solar developer, to develop a clean, renewable energy source.

How much did Antora energy raise?

Feb 22 (Reuters) - Thermal battery maker Antora Energy on Thursday said it has raised \$150 million in a funding round led by a tie-up between the world's biggest asset manager BlackRock (BLK.N) and Singapore state investment firm Temasek.

How does Antora work?

Antora's thermophotovoltaic (TPV) technology converts light from the hot carbon blocks into electricity with no moving parts. This enables output of both electricity and heat at industrial scale. Antora's factory-made thermal batteries flexibly scale to match the energy needs of any industrial facility.

Antora Energy is addressing the intermittent nature of wind and solar with a low-cost, highly efficient thermal battery that stores electricity as heat to allow manufacturers and other energy-hungry businesses to eliminate their ...

To learn more about Antora Energy, visit and follow the company on LinkedIn and Twitter. About Antora Energy . Antora Energy is unlocking zero-emissions industrial heat and power, cheaper than fossil fuels. Antora's thermal batteries convert low-cost, intermittent renewable electricity into reliable industrial energy.

Antora's battery could dramatically expand the application of renewable energy by enabling its use in

industry, a sector of the U.S. economy that accounted for nearly a quarter of all ...

Antora Energy has developed a low-cost, highly efficient thermal battery that stores electricity produced by wind and solar generators as heat, allowing manufacturers and other energy-hungry businesses to eliminate their use of fossil fuels. Above: Antora installs its first commercial-scale unit at an industrial site near Fresno, California.

A thermal battery startup backed by Bill Gates' Breakthrough Energy Ventures has launched its first commercial-scale system, a major step toward its goal of weaning heavy industry off fossil...

An Antora thermal battery leaving the factory Manufacturing at Scale From the very beginning, we've designed our American-made thermal batteries for rapid production and scale. We turned on our first thermal battery deployment in 2023, and now we're on the path to manufacturing thousands. Our landmark gigafactory in San Jose, California is ...

Antora's solution is to collect electricity from inexpensive, renewable sources like wind and solar and store it as high-temperature heat, creating a thermal battery. This stored thermal energy can then be used ...

Antora's solution is to collect electricity from inexpensive, renewable sources like wind and solar and store it as high-temperature heat, creating a thermal battery. This stored thermal energy can then be used directly to provide process heat up to 1500°C, which many industrial processes require, or it can be converted back to the ...

World's First Thermal Battery Capable of Cost-Effectively Delivering Zero-Carbon Heat and Power . Sunnyvale, CA - Antora Energy, a leader in zero-carbon heat and power for the industrial ...

Antora's thermal battery converts low-cost, intermittent renewable electricity into a reliable, on-demand source of zero-emissions industrial heat and power. Industry is the single biggest ...

SUNNYVALE, Calif., June 25, 2024--Antora Energy selected by DOE's ARPA-E for up to \$14.5 million to accelerate the launch of Antora's combined heat and power thermal battery product.

Antora Energy, an American cleantech company founded in 2017, develops a low-cost thermal storage solution for grid-scale energy storage of renewable. ... Antora Energy heat battery. As schematically depicted in the ...

Antora Energy, a developer of thermal batteries, secured \$150 million in Series B funding to help ramp up production. The round was led by Decarbonization Partners, a partnership between BlackRock and Temasek. Emerson Collective, GS Futures, The Nature Conservancy, and a subsidiary of NextEra Energy Resources also participated in this round, ...

Antora's thermal battery can store 15 megawatt hours in the footprint of a shipping container--that's 5 times more than a Lithium-ion battery. Antora's thermal batteries take excess solar and wind energy not needed for the grid, and use it to heat blocks of carbon until they're glowing hot -- think of the glow from your toaster when ...

Antora Energy is unlocking zero-emissions industrial heat and power, cheaper than fossil fuels. Antora's thermal battery uses renewable electricity to heat blocks of solid carbon--a low-cost, earth-abundant, and safe storage medium that's ...
