

# Palestine home solar systems

How many homes in Palestine use solar energy heaters?

Over half of all households in Palestine utilise solar energy heaters, although only 3% of houses depend on it as their main source. A 710kw photovoltaic plant was commissioned in September, 2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.

Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

How much wind energy is used in the Palestinian territories?

It has been estimated that wind energy has the potential to account for 6.6% of energy usage in the Palestinian Territories.

How did solar power work in Gaza?

We renovated 20 desalination plants that provided 15,000 Liters/day across the Gaza strip by deploying solar systems to power them. We installed tens of solar systems to support nebulizers and electric mattresses, in homes with disabled individuals. We installed solar street lights in communities serving more than 7000 people.

Who is most affected by environmental pollution in Palestine?

The majority of individuals exposed to enhanced concentrations of pollutants are women and young children. The Palestinian Energy Authority (PEA) published a 'General Renewable Energy Strategy' in 2012, aiming for 10% of total domestic energy production and 5% of total energy consumption to come from renewable sources by 2020.

What is the agreement between Qudra power solutions and Jerusalem Electricity Company?

Qudra power solutions and Jerusalem Electricity Company agreed to establish a 5 MW power station.

Through a collaborative partnership between the Palestine Investment Fund (PIF) and the MoE, Massader (PIF's energy investment arm) was selected to finance, install, and operate the rooftop solar systems in partnership with the main electricity distribution companies.

With the cutting edge technologies, of high quality and with international standards, we are working to develop renewable energy systems to provide integrated solutions in managing, operating and maintaining systems.

It was found that in spite of the high initial cost, the proposed system was able to offer valuable environmental
