What is Liebert nxctm?

It comes complete with highly efficient transformer-free double conversion technology allowing it to provide installation and operating cost savings. With a rated output power factor of 0.9, the Liebert® NXCTM is also able to provide 11% more active power than a traditional 10-40 kVA UPS.

What is Liebert NXC?

Liebert NXC is a compact solution designed to optimize installation space requirements and provide enhanced flexibility to ensure superior protection for all load types (leading and lagging).

What is Liebert® NXC 80 - 200 kVA?

YOUR VISION, OUR PASSION. The Liebert® NXC 80 - 200 kVA range offers reliable and flexible secure power in a fully integrated package solution. Its highly efficient transformer-free double conversion technology delivers installation and running cost savings.

How much power does a Liebert nxctm provide?

With a rated output power factor of 0.9, the Liebert® NXCTM is also able to provide 11% more active power than a traditional 10-40 kVA UPS. Liebert® NXCTM's combination of performance

Why should you choose Liebert NXC?

Liebert NXC's combination of performance features, impressive integrated autonomy and compact footprint make it ideal for guaranteeing clean, continuous power for a wide range of applications from IT and manufacturing to retail and transport.

What is Liebert NXC ups?

Chapter 1 Product Introduction Liebert NXC UPS (UPS for short) is an intelligent online UPS system with sine wave output developed by Emerson Network Power. The UPS offers reliable and high quality AC power to the precision instrument.
