

Panama roofit solar energy

What is roofit solar energy?

Roofit.solar produces innovative solar roofs that combine a traditional Nordic design with modern solar technology. Roofit Solar Energy is producing first-of-its-kind solar metal roofs. The innovative 2-in-1 solution combines the roofing material and photovoltaic module. We believe renewable energy shouldn't come at the expense of aesthetics.

Why should you choose roofit solar roofs?

Due to nearly invisible solar modules and the aesthetic look of the lightweight vertical roof panels, Roofit.Solar roofs have also proved to be suitable for different architectural needs and urban protected buildings. The humble yet elegant Nordic design has been awarded numerous design and environment prizes.

Is a solar roof a good alternative to a conventional roof?

Solar roof is a great alternative to conventional roof and as source of energy. In the long run, the price of a solar roof is even cheaper than a regular roof because my roof generates electricity over time.

What is a fully integrated solar roof?

Our fully integrated solar roof is optimized for the aesthetical design of the whole house. The sleek vertical lines of a classy black roof will give your house an aesthetic look and blend in seamlessly with any neighborhood. Cutting-edge solar cells are integrated directly into high-quality metal sheets.

What are roofit solar modules?

Roofit.solar modules are building integrated photovoltaic (BIPV) construction elements that replace the conventional roofing and facade materials. Our aesthetically appealing & innovative solution has been recognised by numerous prestigious awards, including European Business Award for Environment, Clean Air Challenge Award & Swedish Steel award.

Why did Andri create a solar roof?

When it came to designing his own house, Andri wanted a solar roof that looked like a regular roof while at the same time generating sustainable electricity. Already existing solutions were costly, bulky, and unattractive. Andri decided to create his own solar roof and founded Roofit.Solar in 2016.

Roofit Solar Energy OÜ is an Estonian company headquartered in Tallinn which operates in the field of Building-integrated photovoltaics (BIPV) and produces a 2-in-1 innovative product: a metal roof with integrated solar panels. It looks like a traditional steel roof and electrically is as powerful as conventional solar panels.

Eco Green Energy is thrilled to announce the successful completion of yet another significant renewable energy installation project in Chitrá, Panama. This landmark project, executed for Solución

Panama roofit solar energy

Renovable S.A., incorporates 120 state-of-the-art Atlas 550W solar panels, resulting in a total installed capacity of 66kW. This initiative ...

The building-integrated photovoltaics (BIPV) solution Roofit.Solar NuClick incorporates solar energy into a robust steel roof in a way that is both aesthetically pleasing and architecturally sophisticated. The light, vertical modules are made using monocrystalline high-tech solar cells that perform extremely well even in poor light conditions.
