

Who visited the Fraunhofer Institute for Solar Energy Systems ISE?

His Royal Highness, The Grand Duke of Luxembourg visited the Fraunhofer Institute for Solar Energy Systems ISE on November 8, 2024. Along with a delegation consisting of politicians and scientists, he was interested to hear about research into integrated photov...

How does a dry period affect energy security in Paraguay?

Long, dry periods increasingly threaten energy security and impact national income from electricity exports. Paraguay is a net energy exporter with hydro and biomass resources contributing 82 per cent of the country's final energy supply over the last decade.

What is Paraguay's wind potential?

The report also highlights Paraguay's wind potential, identified as medium to high quality, which was found to be particularly concentrated in the north-western region, specifically in the department of Boquer...

Can Paraguay become a green hydrogen producer?

Paraguay's ambition to become a green hydrogen producer and regional exporter is also a key motivating factor for its pursuit of higher shares of renewables. In June 2021, the Government of Paraguay and the International Development Bank developed a roadmap for the use of green hydrogen in the country.

3 ... "Close industrial cooperation is the next step in establishing this future technology in Europe," summarized Prof. Andreas Bett, Institute Director at the Fraunhofer Institute for Solar ...

She was nominated for the award by the Fraunhofer Institute for Solar Energy Systems ISE, where she will be working as a visiting scientist from December 1. The focus of the joint ...

The Fraunhofer Institutes for Solar Energy Systems ISE and for Mechanics of Materials IWM in cooperation with industrial partners have explored routes for highly cost effective mass manufacturing ...

3 ... The Fraunhofer Institute for Solar Energy Systems ISE is developing easy-to-use and reproducible solutions for replacing gas and oil heating systems in existing multi-family homes with partners in the project "LC R290". The research focus is on heat pumps that use the refrigerant propane (R290). With a consortium of twenty companies from ...

The impact of renewables and solar energy for future generations is driven by dedicated people world-wide. To advance knowledge and career prospective in solar energy the Fraunhofer Institute for Solar Energy Systems ISE together ...

Fraunhofer ISE Develops Solar-Powered Ice Maker and Solar Dryers for Fishermen and Farmers in Kenya

Fraunhofer ISE and GHD are developing the National Hydrogen Strategy of the United Arab Emirates Prof. Dr. Christopher Hebling receives the Global Excellence Award by Energy and Environment Foundation

1 ?&#0183; Germany's Fraunhofer Institute for Solar Energy Systems ISE has shared results from its five-year lighthouse project MaNiTU. The project, involving six Fraunhofer institutes, worked to identify ...

Fraunhofer Institute for Solar Energy Systems ISE. Verified email at ise aunhofer . Articles Cited by Public access Co-authors. Title. Sort. Sort by citations Sort by year Sort by title. Cited by. Cited by. Year; The link between Ag-paste rheology and screen-printed solar cell metallization.

The Fraunhofer Institute for Solar Energy Systems ISE has been conducting research along the entire battery value chain for many years. Now with today's inauguration of the Center for Electrical Energy Storage, the institute has access to state-of-the-art laboratories which enable cutting-edge international research. Currently the institute ...

Photovoltaic systems equipped with solar trackers show a 20 to 30 percent gain in energy yield compared to fixed ground-mounted systems. Besides this, the layout design and alignment can take other criteria into ...

The Fraunhofer Institute for Solar Energy Systems ISE has developed a fuel cell system to power a portable computer. The components are a four-cell polymer electrolyte membrane fuel cell (PEMFC ...

Researchers from the Fraunhofer Institute for Solar Energy Systems (ISE) have developed a perovskite silicon solar cell with a power conversion efficiency of 31.6%. The cell, measuring 1cm&#178; ...

2 ???&#0183; The development of perovskite-silicon tandem solar cells made of stable materials and manufactured using scalable production processes is the basis for the next technological leap in the photovoltaic industry. ... Institute ...

The Renewables Readiness Assessment identifies high solar energy potential throughout Paraguay which can help decarbonise end-use sectors, including transport, and energise isolated areas of the country, ...

3 ???&#0183; &quot;Close industrial cooperation is the next step in establishing this future technology in Europe,&quot; summarized Prof. Andreas Bett, Institute Director at the Fraunhofer Institute for Solar Energy Systems ISE and coordinator of the ...

At Fraunhofer ISE, we are dedicated to two strategic methods for the manufacturing of ASSB. The production of individual components (cathode, separator and anode) for the self-standing design, allows us to resemble the established process for the production of lithium-ion batteries and thereby investigate the possibility of a drop-in replacement for an accelerated introduction of ...

Photovoltaic systems equipped with solar trackers show a 20 to 30 percent gain in energy yield compared to

fixed ground-mounted systems. Besides this, the layout design and alignment can take other criteria into account, such as the light requirements of certain plant varieties underneath agrivoltaic and biodiversity-PV systems or also the grid feed-in at certain ...
