

Project supports DRC's Updated NDC commitment to reduce its GHG emissions by 21% compared to the 2030 BAU scenario through investment in renewable energy development to meet country's target of 42.7 MW for wind, solar and geothermal energy by 2030.

PES has for a number of years, been regarded as a leading trade publication across both the Solar/Photovoltaic and the global wind market, both onshore and offshore. Having been established in 2005 PES continues to deliver cutting-edge insight & technical analysis of the key issues & topics affecting the markets around the world, through its... Read more &#187;

The Republic of Congo is undergoing a transformative period in its energy sector, marked by the introduction of emerging technologies and project advancements across the oil, gas and renewable energy space.

NURU develops and operates commercially-viable isolated solar-hybrid "metrogrids" (utility-scale urban mini-grids) that provide reliable, affordable and clean energy in the Eastern region of the Democratic Republic of Congo.

Delta, a global leader in power management and a provider of IoT-based smart green solutions, announced today it has provided approximately 3,500 Delta M125HV PV inverters to MOVE ON Energy GmbH to power Europe's largest solar power plant, the 650MW Witznitz Solar Park.

A 15MW solar project is set to be developed and constructed in the Democratic Republic of Congo (DRC) as part of the International Solar Alliance's (ISA) first pilot project under its Global Solar Facility (GSF).

As the largest country in Sub-Saharan Africa by area, the Democratic Republic of the Congo (DRC) is endowed with exceptional natural resources. However, persistent conflicts and a challenging political and economic environment have ...
