

Do you offer a fully integrated PV mounting system?

We also offer a completely integrated PV mounting system, Viridian. These modules have part of the mounting system integrated into their own frames. Compatibility plays a big part in choosing an in-roof solution.

How to understand solar mounting system's datasheet?

When aiming to understand solar mounting system's datasheet, professionals must be wary of common pitfalls: **Overlooking Environmental Factors:** Ensure that the mounting system is suitable for the local climate and geography. **Ignoring Compatibility:** Check that the mounting system is compatible with the solar panels and the installation site.

What are the components of a solar mounting system?

Solar mounting systems comprise several components: **Mounting Brackets:** These secure the solar panels to the mounting structure, ensuring stability. **Rails:** Rails provide a base for mounting the solar panels, acting as the backbone of the structure. **Clamps:** Clamps secure the solar panels to the rails, ensuring they are held firmly in place.

How to choose a solar mount system?

For instance, roof mounts are suitable for residential buildings, while ground mounts may be ideal for large-scale solar farms. **Compatibility with Solar Panels:** The mounting system must be compatible with the dimensions, weight, and design of the solar panels to ensure a secure and stable installation.

Can I order solar panels online?

If you've already setup your CEF account online, [click here to sign in](#) otherwise [click here to activate it now](#). No account? No problem. You can now order online as a guest! Everything you need to buy solar panel mountings, fixings, brackets and rails are available from CEF. Perfect for roof, ground or wall mounted solar panels.
