

Photovoltaic panel installation factory

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

Why should manufacturing and engineering businesses install solar PV panels?

Through installing solar PV panels manufacturing and engineering businesses are able to considerably cut their overheads, improve business operations and increase their bottom line with up to 100% savings on their daytime electricity costs.

Can industrial buildings use solar panels?

Industrial buildings have straightforward roof spaces that are ideal for solar panels. Businesses can significantly reduce their overheads by generating their own electricity from solar energy with industrial solar panels. Mypower specializes in installing high yielding and efficient industrial solar panels, which have won awards for their design.

Who makes British solar panels?

British Brand Global Solar PV panel and products manufacturer and installer in over 21 global locations. All your solar products, one manufacturer. UK Solar Power offers free solar project design & British advance replacement warranties. For more information please write to info@uksolarpower.com
