

What is a roof mounted photovoltaic system guidance?

The guidance refers only to the mechanical installation of roof mounted integrated and stand-off photovoltaic systems; it provides best practice guidance on installation requirements and does not constitute fixing instructions.

Can a PV system be installed on a fire rated roof?

PV system onto a fire-rated roof changes the dynamics of fires that develop. If a fire develops on a roof with a PV system, the presence of the modules can keep the released energy closer to the roof and increase temperatures and heat fluxes to the roof. Thus, fires that could otherwise

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast. 3. Location of solar panels

Can PV panels be installed on a new roof?

Where PV panels are to be installed on an existing roof, consideration should be given to the extra weight they will add. If you are planning to install panels on a new roof as part of a new build or reinstatement, it is important to be aware of the different risk implications of different roof types (e.g. flat vs pitched).

What is the best practice manual for rooftop solar photovoltaic systems?

5.11.1 Solar Energy UK have produced an O&M document, Industry best practice manual 2.0: Guidelines for the operation and maintenance of rooftop solar photovoltaic systems. This provides a comprehensive guide to best practice in terms of maintenance in the context of rooftop systems.

How do I design a roof-mounted PV solar panel?

2.1.1.1 Design all roof-mounted, rigid PV solar panels and their securement using basic wind pressures in accordance with DS 1-28, Wind Design. Adhere to the following recommendations except where noted otherwise: Use the design wind speeds as noted in Data Sheet 1-28.
