

Photovoltaic walkway board custom price list

How does a solar walkway work?

The Solar Walkway uses solar energy from the sun to generate power. This power is fed back directly to the local grid or stored in a battery. The electricity can be used to power lights, charge vehicles, or other electronic devices. The floor tiles contain LED lights and are covered with a walkable glass layer to encourage engagement with citizens.

How much energy does a walkway solar panel generate?

The panels have an efficiency rating of two-thirds of regular PV panels. They generate up to 35Wp. Each module is 60 x 60 cm. The energy generated is sent back into the grid. 9 sensors on every Walkway module make the floor a powerful touchpad with endless possibilities.

What is a solar walkway project?

Solar Walkway projects support both indoor and outdoor installations in smart cities, as well as smart buildings. Whether it is a new office space, headquarters, hospital or shopping mall, The Solar Walkway combines smart technology and sustainability to your upcoming building project.

The Solar Walkway uses solar energy from the sun to generate power. This power is fed back directly to the local grid or stored in a battery. The electricity can be used to power lights, charge vehicles, or other electronic devices. The ...
