Justin Sun built a solar system for residents of the Pitcairn Islands, and the first solar system named "TRON System" was installed in December 2020. In the future, all the homes on the island will be able to complete the installation of the solar system.

Solar Power to replace fossil fuel fits well with Pitcairn's blue and green economic objectives. A large number of companies from around the world tendered for the project, all were of a high calibre and after much ...

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy ...

## Pitcairn Islands driptech solar

Through Project Pitcairn, we are renovating the Down Fletcher dwelling to make it suitable for a total of 12 workers. This renovation will create welcoming, cost-effective living spaces that support long-term volunteer engagement, further enriching Pitcairn's initiatives in tourism, conservation, and community development.
